Cladding Systems

Cover profiles provide an innovative appearance on facades

SARAY®

VERTICAL

PROAL

Zahvaljujući sistemu, koji se može koristiti kako u postojećim, tako i u novim zgradama. Obezbeđuje se ventilacija fasade na ugrađenim površinama. Moderan izgled je obezbeđen na fasadama sa pokrivnim profilima različitih dizajna i veličina. Može se koristiti inu enterijeru. Montaža se može izvršiti lako i brzo! Možemo ofarbati u željene RAL boje, eloksiranu površinsku obradu i alternativno opcije boja u obliku drveta! zahvaljujući tome fasadama se daje drugačiji izgled. Drugačija veličina! Mogu se kreirati nezavisni dizajni! Različite alternative boja i tekstura! Hvala Arhitektama! Ovaj put vodi u kreiranju stilske postavke fasade.

NOVO!

Održive fasade i strukture se uvode u upotrebu sa aluminijumskim profilima koji se mogu reciklirati. Sa VERTIKALNOM SARAY OBLOGOM objektima se pruža bogat izgled za samo 7 dana

Thanks to the system, which can also be used in existing structures along with new structures, it is ensured that the facade gets air on the surfaces where the application is made.

Innovative appearance is provided on the facades with cover profiles in different designs and sizes. It can be used together with all other architectural aluminum system solutions of Saray. The application can be made easily and quickly. It gives a different appearance to the facades thanks to painting in the desired RAL colors, anodizing surface treatment and, alternatively, wood effect color options. With the system that allows the use of Decking profiles of different sizes together, independent designs can be created on the facades. Thanks to its different color and texture alternatives, it leads architects in creating the style facade design they want in buildings.

Sustainable facades and structures are brought into use with recyclable aluminum profiles. A rich appearance is provided to the structures with SARAY VERTICAL CLADDING.

TEHNIČKE MOGUĆNOSTI - TECHNICAL PROPERTIES

- Prave se beskrajne vrste kombinacija sa željenom RAL bojom i šarom.
- Ima skrivene detalje za montažu.
- Jedinostavne detalje za proizvodnju.
- Okružuje celu strukturu kao školjku, dajući objektima novi identitet.
- Može se integrisati sa vratima i prozorima što dodatno pruža Arhitekti slobodu u dizajnu.
- Omogućava skretanje pod uglom.
- Svojom lakoćom ne donosi dodatno opterećenje na samom objektu zbog same legure.
- Štiti omotač zgrade od negativnih spoljašnjih uticaja.
- Može se koristiti i zatvorenom prostoru - enterijeru
- Endless kinds of combinations are made with the desired color and pattern.
- It has hidden mounting details.
- There are easy manufacturing and assembly details.
- It wraps the entire structure as a shell, giving a new identity to the structures.
- Can integrate with doors and windows.
- Gives architecture freedom in design.
- Allows angled turns.
- With its light weight, it does not bring additional load to the structures.
- Protects the building shell from negative external influences.
- It can be used indoors as well as outdoors of buildings

POPREČNI PRESEK PROFILA - TECHNICAL DRAWING

SVC01: Poklopni profil dimenzija 20 mm x 30 mm: Elegantna fasadna konstrukcija sa vertikalnim kal.

SVC02: Poklopni profil dimenzija 40 x 30 mm: Daje novi izgled strukturi sa modernim efektom na fasadi.

SVC03: Šuplji pokrivni profil dimenzija 45 x 32 mm: Zahvaljujući svojoj šupljoj strukturi, obezbeđene su različite nijanse i bogat izgled na fasadi.

SVC01: Cover profile with dimensions of 20 mm x 30 mm: Elegant facade construction with thin vertical lines.

SVC02: Cover profile with dimensions of 40 mm x 30 mm: Gives a new layer to the structure with the dominant profile effect on the facade.

SVC03: Hollow cover profile with dimensions of 45 mm x 32 mm: Thanks to its hollow structure, different shades and a rich appearance on the facade are provided.
