VPS sistem pergola

VPS sistemi pergola i krovova sa otvaranjem i zatvaranjem izrađeni su najsavremenijom tehnologijom i nude pouzdana rešenja za sve četiri sezone. Bilo da uređujete privatnu baštu ili poslovni prostor, VPS nudi arhitektonska rešenja koja donose udobnost, praktičnost i estetiku u svim uslovima.

Sistemi pergola od black-out tkanine u krem-beloy i sivoj boji štite spoljašnji prostor od sunca, kiše i vetra. Vodonepropusna tkanina omogućava dugotrajnu upotrebu i odlikuje se visokom otpornošću na požar. Senzori sunca i vetra, integrisani u konstrukciju, omogućavaju automatsko reagovanje putem sistema daljinskog upravljanja i štite prostor i nameštaj od oštećenja usled sunca i vetra. Za aluminijumske delove konstrukcije nema ograničenja u izboru boje. Pažljivo osmišljeni detalji i dizajn VPS sistema pergola olakšavaju svakodnevni život tokom dugog niza godina.

VPS Pergola Systems

VPS architecture collapsible pergola and ceiling systems enable solutions which produced the most developed technology and used with confidently in climatic conditions of four seasons. VPS has certainly special architectural solutions bringing warmth, convenience and aesthetics to either special garden or commercial place in every situation to. Pergola systems produced to black-out fabric with color options of brooken white and grey enables that outer spaces protects from wind, rain and sun lights, which it enables to be used over years thanks to impermeableness and has supernal endurance to fires. Sun and wind sensor that desingned suitably to construction enable automatic intervention to situations with mechanism of remote control which residence and furnitures have agings, can be formed because of sun lights and wind. Pergola Systems have more color options. VPS Pergola Systems which have careful and detailed design make easier your life in over years.
